ADJOURNMENT

The next meeting of the Recreation and Parks Commission of the City of Redondo Beach will be held on March 11, 2015 in the City Council Chambers.

It is the intention of the City of Redondo Beach to comply with the Americans with Disabilities Act (ADA) in all respects. If, as an attendee or a participant at this meeting you will need special assistance beyond what is normally provided, the City will attempt to accommodate you in every reasonable manner. Please contact the City Clerk's Office at (310) 318-0656 at least forty-eight (48) hours prior to the meeting to inform us of your particular needs and to determine if accommodation is feasible. Please advise us at that time if you will need accommodations to attend or participate in meetings on a regular basis.

An Agenda Packet is available 24 hours a day at the Redondo Beach Police Department and at www.redondo.org under the City Clerk. Agenda packets are available during Library hours, at the Reference Desk at both the Redondo Beach Main Library and North Branch Library. During City Hall hours, Agenda Packets are also available for review in the Office of the City Clerk.

Any writings or documents provided to a majority of the Recreation and Parks Commission regarding any item on this agenda will be made available for public inspection at the City Clerk's Counter at City Hall located at 415 Diamond Street, Door C, Redondo Beach, California during normal business hours. In addition, such writings and documents will be posted, time permitting, on the City's website at www.redondo.org.

ITEMS FOR DISCUSSION PRIOR TO ACTION
Moonstone Park Project Revised Site Plan

Interim Director Smith provided information on the location, background, and timeline for the project. He said the plan will be sent to the Harbor Commission and City Council.

Chuck Foley from Hirsch and Associates Inc, explained that his company was hired to prepare plans and specifications. He displayed the location of the project site and explained the 3 uses: Harbor Patrol facility, outrigger storage with launch, and park space. He displayed the previous plan, revised plan without the mast-up storage, and engineered boat launch. He said the green space occupies 33% of Mole B - 75,000 sq. ft. He explained the 75' diameter circle represents a helicopter landing zone. He described the proposed walkway, hardscape plaza area, picnic tables, shade trellis, Harbor Patrol parking, park parking, planters, and marine advisory flag pole. He said the building concept is modeled after the new marine patrol facility and contains 2 restrooms, outdoor shower, utility room, storage room, outdoor sink, and drinking fountains. He said the launch depicts a 65-70' gangway which is 8' wide and an ADA accessible ramp which is 4'wide and 80' long. He said that turf alternatives are possible i.e.artificial turf, sand, decomposed granite, bark, and mulch. He invited questions.

In response to Commissioner Thomas, Mr. Foley said that granite material can be stabilized for the helicopter pad and may need maintenance. He said that sand would blow and would require raking and may attract animals. He said heat is a concern with artificial turf and it would also require raking to redistribute infill.

In response to Commissioner Elder, Mr. Foley was not aware of nearby access to reclaimed water.

In response to Commissioner Mallen regarding neighbors and stakeholders who will use this site, Mr. Foley said his company met with many people. He said the Coastal Commission determined that marine or coastal use is required and he said marina residents would be the prime users. He described Moonstone Park as a hidden gem. He said the launch ramp raised the most debate with concern about location, safety, and outrigger use. He said the facility cannot be designed with a ramp that does not meet building code

Commissioner Sandoval commented that residents are not aware of the public park and he questioned whether directional signage exists on Harbor Drive.

In response to Commissioner Mallen, Mr. Foley pointed out the existing dock location, oil booms, emergency spill setup, and launch.

In response to Commissioner Elder, Mr. Foley stated that a plan for dealing with the harbor seals has not been addressed.

Sean Guthrie, King Harbor Marina, stated that park signage does exist and the gates at King Harbor Marina control parking and are not manned most of the time. He recommended metered parking once the plan is approved. He provided further background information and submitted a plan which he said was considered earlier in the process.

The motion by Chairperson Michael and seconded by Commissioner Elder to receive and file the plan was unanimously approved.

Mr. Guthrie explained that the previous plan included a sailing center which turned out to be too expensive. He said he is working with King Harbor Yacht Club on that and he supported small sailboat mast-up storage specifically for lightweight boats 16' and under. He was not sure why storage is excluded from the current plan. He said King Harbor

Marina offers slips to the City and King Harbor Youth Foundation offers sailing instruction.

Mark Hansen, King Harbor Voters Advisory Panel submitted a document.

The motion by Chairperson Michael and seconded by Commissioner Sandoval to receive and file the document was unanimously approved.

Mr. Hansen read from the Tidelands Trust including the requirement for boat storage and was surprised that the small mast-up storage was removed from the existing proposal. He said that attachment 4 included in the packet was not approved by the City and the approved plan includes mast-up storage. He said concerns have been expressed about the hazards of the proposed ramp and that Director Carmichael said cutting into the mole is a possibility. He supported the installation of mast-up storage which he said would attract younger boaters. He said slips are empty and club memberships are down. He supported fewer small slips and more large ones. He recommended a boat ramp that does not protrude into the main channel, limiting launching to tenants, and that City Council work with King Harbor Marina to preserve mast-up storage.

Laura Scarborough, audience member, spoke in support of canoe launching. She said the area is congested and general public launching is hazardous. She was not opposed to mast-up storage.

Rosemary Vello, audience member, did not support the proposed boat ramp location because she felt it would create a hazard.

Mr. Foley said that ramp slope is a factor in the ramp location. He said the design is code compliant.

Mr. Bardeen, audience member, expressed the importance of safety. He said the proposed launch ramp is unsafe and an obstacle for boats. He said that training is necessary for boat launching and he recommended limiting use to marina tenants.

Jim Morel, audience member, said that extending the ramp 65' out into the channel is hazardous.

Marci Guillermo, audience member, stressed the safety issue and said the public and tenants must be accommodated. She did not support the CenterCal proposal and said the area should be for public and community use. She encouraged the Commission to find the optimal location for the boat launch.

At this time Commission Mallen exited the meeting.

Mr. Guthrie said the Seaside Lagoon is a very accessible SUP launch location as are the beaches. He said the focus should be on the outriggers.

In response to Commissioner Elder, Mr. Foley said a cost estimate for cutting into Mole B has not been prepared. He said the revetment was built in the 1960's and it's best to leave it alone.

Commissioner Sandoval did not believe the Harbor Commission has the experience or expertise to discuss the type of ramp to install. He agreed with the public launch concept. He did not agree that adding a sailboat storage area would attract 30-40 year-old boaters.

Mr. Foley said the existing proposal is different from that released in the RFP and uses only leasehold property. He said the proposed launch location takes into consideration the fact that launching sailboats off the west side of Mole B is not feasible. He said the reason why the proposal shows nothing on the parking lot is because the City is moving forward without knowing what the leasehold is planning. He said the launch ramp is designed for public use; however other options and configurations are available.

Ms. Scarborough said that ADA requirements may not apply if the launch space is for tenants only; and consequently different design ideas could be considered.

Interim Director Smith advised that opposition to the ramp protruding into the channel was clearly understood at previous public meetings.

Commissioner Sandoval recommended working toward a ramp that does not protrude 65' into the channel.

Chairperson Michael did not support the installation out into the channel.

In response to Chairperson Michael, Mr. Foley said any ramp must meet code. He clarified the ramp actually protrudes 25' from the low tide line.

Commissioner Elder liked the idea of skilled groups using the launch and he questioned the Coastal Commission's position on a non-public launch.

Mr. Guthrie said the park space provides coastal access and the ramp issue only comes up with respect to the outrigger clubs that have been using the facility for years. He said that possibly a launch could be created off the leasehold.

Mr. Bardeen stated that smaller boats as well as paddle boarders and kayakers would be forced to go around the encroachment into the traffic of larger vessels.

Commissioner Thomas said that protruding out is an issue; however the ADA component is important.

Chairperson Michael preferred grass for the park area, particularly for the helicopter landing spot.

Commissioner Sandoval said that grass by the ocean is wasteful: he did not recommend sand.

Mr. Foley said that turf infill product would move around and requires irrigation. He supported turf from the standpoint of a recreational area that can be sensibly irrigated and maintained.

Ms. Guillermo suggested installing a wide area for people to walk along the water.

The motion by Commissioner Mortillaro and seconded by Commissioner Sandoval to approve the following recommendations to City Council was unanimously approved:

1. No boat ramp in the channel
2. Limit to tenant ADA compliant launching only pending Coastal Commission approval
3. Work with King Harbor Marina for mast-up dry storage
4. Support park plan layout with continued research for type of landscape covering
5. Provide adequate walking areas

Election of Officers

Commissioner Thomas nominated Chairperson Michael for the position of Chairperson.

Commissioner Sandoval nominated Commissioner Thomas for the position of Vice Chairperson.

Chairperson Michael was unanimously approved for the position of Chairperson and Commissioner Thomas was unanimously approved for the position of Vice Chairperson.

COMMISSIONER REFERRALS TO STAFF

Interim Director Smith referred to the handout listing Redondo Beach park acreage in comparison to other beach cities and explained that the Valley Greenbelt trail adds to Hermosa and Manhattan Beach acreage.

Chairperson Michael requested a briefing on the Harbor Drive project. He also requested an update on the request for monthly Commission meetings.

The motion by Commissioner Sandoval and seconded by Commissioner Elder to adjourn the meeting was unanimously approved.

Chairperson Michael adjourned the meeting at 9:10 p.m. to the next regular meeting on January 14, 2015.

Respectfully submitted,

_____
