

When: July 18-22 (one week)

Where: 200 N. PCH, RB Ca 90277

MINESCRATCH

Learn how to speak the language of computers! Campers will dive into the exciting world of computer coding through Scratch, developed at MIT. Scratch is a block-based application designed to make it simple for anyone to learn programming. Throughout the camp, coders create projects like an epic space battle game or choose your own adventure story! The possibilities to create are endless! We'll also occasionally use other applications like MC Edit (Minecraft-related) based on student interest and aptitude.

MINECRAFT MODDING

Why just *play* Minecraft when you can *create* Minecraft? In this camp designed for quick learners or those with block-based coding experience, campers will learn how to code in Java by making a mod for Minecraft! This is professional, text-based coding. Create and then craft a sword out of mushy bananas, or spawn a flying golden cow! Make the full transition from player to content creator!

CODE TO THE FUTURE

**VIDEO GAME DESIGN:
MINESCRATCH!**

9 a.m.-12 p.m.

Ages: 7-12

Fee: \$170

Camp #: 41699

**VIDEO GAME DESIGN:
MINECRAFT MODDING!**

1-4 p.m.

Ages: 9-14

Fee: \$220

Camp #: 41698
